Programming Assignment #1

It's About Me!

CS 1428.004, Fall 2011
Instructor: Jill Seaman

Due: in class Wednesday, 9/7/2011 (upload electronic copy by 9:00am)

Problem:

Write a C++ program that will output information about you to the computer screen. The output should look like this:

```
Name: <your name>

Major: <your major, spelled out please>

Favorite Book or Movie: <put title in quotes. Book author optional>
```

Replace the stuff in the angle brackets with your own information. Here's an example:

```
Name: Jill Seaman

Major: Computer Science

Favorite Book or Movie: "The Gods Must Be Crazy"
```

It's ok if the title is long and it wraps onto the next line.
There must be a blank line between each item.

Logistics:

Include the following header at the top of the source code file (add your name, date and assignment number)

```
// File Name:
//
// Author:
// Date:
// Assignment Number:
// CS 2308.004 Fall 2011
// Instructor: Jill Seaman
//
// <Brief description of the contents and purpose>
```

Name your file **assign1_xxxxxxxxx.cpp** where xxxxxxxxx is your 9 character TX state ID number, the one that is on your ID card. It should look something like this: A04123456. If yours is just six digits, then add "A00" to the front.

There are two steps to the turn-in process:

1. Submit an electronic copy using the following upload link
   by 9:00am, Wed 9/7/2011: http://www.cs.txstate.edu/~js236/homework
   (I will also put a link directly to this page on the course website).
   Click on CS1428.004, and log in with your Net ID and follow the directions to upload your file.

2. Submit a printout of the file at the **beginning of class on Wed 9/7/2011**.
   Please print your name on the front page. Or the only page.
